Ronald R. Higgins
Superintendent

418 Mineral Avenue
Libby, MT 59923

November 2011

Greetings!

Each year the office of the Lincoln County Superintendent of Schools is pleased to prepare this statistical report and provide it to the Lincoln County Commissioners, school trustees, school administrators, legislators and interested individuals. This is a report of the facts and figures of school finance and enrollment. This report is available on-line at the following site:

[Statistical Report 2011](#)

Figures in this report are taken or calculated from the annual Trustees Financial Summary for each school district, school district budgets, and other reports prepared for the Office of Public Instruction. The report looks at revenues and expenditures for the 2011-2012 school year and also looks backward to expenditures for 2010-2011. This report attempts to picture the financial activities and enrollment trends of school districts from various perspectives and compares a number of variables to make understanding school finance as simple as possible.

If there are questions or concerns about items in this report, please contact my office or you can direct your inquiries to your local school district clerk. I would like to personally thank Shawneen Davis for the many hours of work that she spent compiling the facts and figures for this report.

Sincerely,

Ronald R. Higgins

Ronald R. Higgins
