HISTORY OF SURVEY

1893 Original GLO survey of township lines by D. Mumbrus.
1893 Original GLO subdivision survey by D. Mumbrus.
1967 BLM Remonumentation of original corners by Damm, French and Lindenberg.

METHOD OF SURVEY

A one second Total Station and Data Collector were used with closed traverse procedures to tie original controlling corners. The location of the monuments set this survey meet the positional tolerance standard referenced in the USDA, Forest Service, Region One, Cadastral Specification Manual, dated March 1987.

SURVEYOR'S NOTES

All controlling corners used to subdivide this section were original GLO corners, or BLM Remonumentation thereof. Corner Recordations have been filed with the Clerk and Recorder's Office, Lincoln County Courthouse, Libby, Montana, for all found or set corners shown on this Certificate. According to the original GLO plat and notes, Section 4 is a fractional section without the East and South Quarter Corners being set or platted. Therefore, I subdivide this section by using parallel lines for the interior subdivisional lines and the establishment of minor subdivisional corners.

PURPOSE OF SURVEY

The purpose of this survey is to locate upon the ground, the title lines of record between private lands and National Forest System Lands. No division of land is hereby created.

BASIS OF BEARING

Bearings are based upon a Solar Observation.
