HISTORY OF SURVEY

1894, G.L.O. subdivision and meanders of township by Frank L. Sizer and Joseph J. Squeth
 1960, G.L.O. remonumentation of G.L.O. corners by David R. Cunningham

METHOD OF SURVEY

Control was accomplished using survey grade Global Positioning System Trimble 4000 SSE and an internal Least Squares Adjustment. Survey was not tied to N.G.S. control stations. A one second total station and data collector was used with closed traverse procedures to tie the original controlling corners to GPS control. The location of the monuments set this survey meet the positional tolerance standard referenced in the U.S.D.A. Forest Service, Region One, Cadastral Contract Specification Manual, dated 1987.
