NOTE

Book 16, Page 358 calls out the courses for the north line, but not the south line of the Reese Quit Claim for a road. Book 16, Page 902 does not call out courses for the south line, but instead says along the south line of the private road. The width of the road is not clear or specific. The difference in the distances called out in the two deeds along the waterline easement is 48.3 feet. On Plat 1868 the suggested width is closer to 60 feet. I have shown the width here to be 60 feet, however, as shown hereon, the actual road locations in this area do not necessarily correspond to what is of record. Since the intent of this survey was to delineate on the ground the westerly line and the boundary around the northeast corner, no effort was made to determine exact boundaries along the roads, other than graphically depicting record and found positions.
