nuent record used to evaluate the corner position. 1. Original and

ote diecre ancies in the record, state method of e plishing lost or obliterated corners.

Description of monument and accessories set to perpetuate the corner position.
 Sketch or corner, show all pertinent data which can best be shown in a sketch example, corner marking, topography ties, position of accessories, etc.

5. Certification must be signed and sealed by Registered Land Surveyor in State of Montana.
6. Fill in Cross Index & Seciton Diagram at bottom of sheet.

CERTIFIED CORNER RECORDATION

T. 29N R. 29W P.M.M. Lincoln Corner SE Cor. of Sec. 11 County

1898 Original GLO Record: Set a slate stone 24x10x4 ins. 18 ins. in the ground, for cor. of sec. 11,12,13, and 14, marked with 4 notches on S. and I notch on E. edges; from which;

A fir 20 ins. diam. bears N12°40'E. 107 lks. dist. marked T29N R29W S12 BT.

A pine 26 ins. diam. bears S 38°40'W 173 lks. dist. marked T29N R29W S14 BT.

, A pine 24 ins. diam. bears N45°10'W 76 lks. dist. marked T29N R29W SII BT.

No tree within limits in sec 13; raised a mound of stone, 2ft. base, 1 ½ ft. high, W. of the cor.

1966 BLM Remonumentation: The cor. of secs.11,12,13, and 14, monumented with a slate stone, 18x10x4 ins., firmly set, mkd. with 1 notch on the E. edge and 4 notches on the S. edge, and witnessed by three of the original bearing trees.

At the corner point;

Set an iron post, 30 ins. long, 24 ins. diam. 24 ins. in the ground

with brass cap mkd.

T29N R29W | S12 | S13 1966

from which the original bearing trees:

A fir 18 ins.diam. bears N12°45'E 105 lks. dist. mkd. with an overgrown blaze. (record:N12°40'E 1071ks.)

A pine 20 ins. diam. bears \$38°45'W 170 lks. dist. mkd. with an overgrown blaze. (record \$38°40'W 173 lks.)

A pine 16 ins. diam. bears N43°W 78 lks. dist. mkd. with an overgrown blaze. (record: N45°10°W 76 lks.)

The new bearing tree: A fir 16 ins. diam. bears S 51°E 28 1ks. dist. mkd. T29N R29W S13 BT. Bury the original stone alongside the iron post.

II. I found a 3½ ins. diam. BLM brass cap, 3 ins. out of the ground, marked as shown from which;

A pine 38 ins. diam. bears \$38°W 115 ft. with visible scribe. A p.pine stump 30 ins. diam. bears N46°W 52.0 ft. with visible

scribe. A doug fir 30 ins. diam. bears N15E 73.1 ft. Healed face

A doug fir 21 ins. diam. bears S51°E 19.2 ft. with visible scribe

III. I set a 6 ft. galvanized steel guard post with a "Survey Marker" decal attached, 1 ft. north of the corner. I blazed and marked one new bearing tree:

A fir 11 ins. diam. bears N27°W 60 ft. scribed T29N R29W S11 BT. I painted red bands around the bearing trees, attached BT and Land Survey Monument signs.

INSTRUCTIONS TO SURVEYORS FOR COMPLETION OF CERTIFIED CORNER RECORDATION FORMS

I. ORIGINAL AND/OR SUBSEQUENT RECORD:

This item should describe or quote those portions of the original or subsequent record which were used in evaluating the corner position. The original record will usually be the General Land Office field notes. Subsequent record can come from several sources: Previously filed corner records, maps and plats, private and public records, etc. Some of the subsequent record, even though not in the public record, but known to have validity by the surveyor, may be quoted and appropriately noted.

The record data helps support the reestablished corner position because it clearly shows what history the surveyor based his corner position on. In some cases, however, the record may be unknown or not pertinent. A statement to that effect should appear on the corner record.

II. DESCRIPTION OF EVIDENCE FOUND OR METHOD OF LOCATING CORNER POSITION:

This item will describe the original or subsequent record evidence found. If portions of the found evidence cannot be recordiled with the record, then the disregarded record should be noted, and, if possible, an opinion as to its cause narrated.

If no physical evidence of the original or subsequent monuments and accessories can be found, then the method used to reestablish the lost or obliterated corner (single proportion, fence intersection, parol evidence, terrain calls, centerline of road, etc.) shall be indicted.

III. DESCRIPTION OF MONUMENTS AND ACCESSORIES SET TO PERPETUATE THE CORNER POSITION:

This item should list all details about the corner and its location which will help exclusively identify the corner position; including size and type of monument, how marked if not shown in sketch, and distinguishing topographic calls which help locate the corner. In many cases, instructions on how to find the corner should be included.

References or ties to other corners are optional and may be drawn on the face or back of the corner record form, or references to Certificate of Survey may be made. Separate drawings may be attached to the corner form.

If state plane coordinate values for the corner position are shown, then the control upon which they are based should be indicated.

IV. SKETCH OF CORNER:

This item will usually show how a found or set corner is marked and may also show topography or accessory monuments found or set and their relation to the corner. There is no stipulated format; the sketch could be transcribed field note entries.

V. CERTIFICATION:

The name and signature of the ground party chief is optional.

The Surveyor who performed or directed the field work which is depicted on the "Certified Corner Record" shall sign and affix his seal in the Certification.

The employer blank is optional but useful in tracking down original field note data or adjacent record if, in the future, questions arise about the corner.

vi

The Cross Index at the bottom of the page should be completed by the Surveyor. Only the single Township index where the corner is filed shall be completed.

The lower righthand corner is a corner location diagram and should have the pertinent section filled in at the top and a closed circle indicating the appropriate corner position in the section filled in. This is intended to be an aid in searching the "Record" once it has been filed.
