INSTRUCTIONS

- 1. Original and/or subsequent record used to evaluate the corner position.
 2. Description of evidence found, note discrepancies in the record, state method of establishing lost or obliterated

3. Description of monument and accessories set to perpetuate the corner position

Inscription of monument and accessories set to perpetuate the corner position.
 Sketch of corner, show all pertinent data which can best be shown in a sketch example, corner marking, toping apply ties, position of accessories, etc.
 Certification must be signed and scaled by Land Surveyor registered in the State of Montana.
 Fill in Cross Index & Section Diagram at bottom of sheet.

CERTIFIED CORNER RECORDATION

Corn er _	NE-SE 1/64	,	T.	33 N	R.	34 W	_P.M.M.	Lincoln	Co	unty
------------------	------------	--------------	----	------	----	------	---------	---------	----	------

RECORD:

Certificate of Survey No. 781 by Ninneman Engineering done in April of 1980.

Certificate of Survey No. 1114 by Ninneman Engineering done in May on 1982.

FOUND:

No monuments were found for the above mentioned Certificate of Surveys during a field search of the area.

MAINTENANCE:

The NE-SE 1/64 Corner for Sec. 9 was set by computed location from a sec. breakdown of Sec. 9 by Davis Surveying, Inc. on record in the Lincoln County Courthouse.

At the computed location set a 5/8 inch diam. steel rebar 24 ins. long, 20 ins. in the ground with a 1 1/4 inch diam. P.V.C. cap stamped KED 4975-S, as shown below, from which:

A Douglas Fir 13 1/2 ins. diam. bears S. 25° W. 33.43 ft. dist. scribed NE-SE 1/64 S9 BT.

A Douglas Fir 9 ins. diam. bears N. 56° W. 9.97 ft. dist. scribed NE-SE 1/64 S9 BT.

Painted scribed faces red and 6 inch red bands around both Bearing Trees.

Attached Bearing Tree signs and Attention signs to both trees.

The intersection of an old fence line bears south 9 ft. dist.

RUCTIONS TO SURVEYORS FOR COMPLETION OF CERTIFIED CORNER RECORDATION FORMS

I. ORIGINAL AND/OR SUBSEQUENT RECORD:

This item should describe or quote those portions of the original or subsequent record which were used in evaluating the corner position. The original record will usually be the General Land Office field notes. Subsequent record can come from several sources: Previously filed coner records, maps and plats, private and public records, etc. Some of the subsequent record, even though not in the public record, but know to have validity by the surveyor, may be quoted and appropriately noted.

The record data helps support the reestablished corner position because it clearly shows what history the surveyor based his corner position on. In some cases, however, the record may be unknown or not pertinent. A statement to that effect should appear on the corner recor

II. DESCRIPTION OF EVIDENCE FOUND OR METHOD OF LOCATING CORNER POSITION:

This item will describe the original or subsequent record evidence found. If portions of the found evidence cannot be reconciled with the record, then the disregarded record should be noted, and, if possible, an opinion as to its cause narrated.

If no physical evidence of the original or subsequent monuments and accessories can be found, then the method used to reestablish it lost or obliterated corner (single proportion, fence intersection, parol evidence, terrain calls, centerline of road, etc.) shall be indicated.

III. DESCRIPTION OF MONUMENTS AND ACCESSORIES SET TO PERPETUATE THE CORNER POSITION:

This item should list all details about the corner and its location which will help exclusively identify the corner position; including siz and type of monument, how marked if not shown in sketch, and distinguishing topographic calls which help locate the corner. In many case: instructions on how to find the corner should be included.

References or ties to other corners are optional and may be drawn on the face or back of the corner record form, or references to Ce tilicate of Survey may be made. Separate drawings may be attached to the corner form.

If state plane coordinate values for the corner position are shown, then the control upon which they are based should be indicated.

IV. SKETCH OF CORNER:

This item will usually show how a found or set corner is marked and may also show topography or accessory monuments found or set an their relation to the corner. There is no slipulated format; the sketch could be transcribed field note entries.

V. CERTIFICATION:

The name and signature of the ground party chief is optional.

The Surveyor who performed or directed the field work which is depicted on the "Certified Corner Record" shall sign and affix his seal I the Certification.

The employer blank is optional but useful in tracking down original field note data or adjacent record if, in the future, questions aris about the corner.

VI

The Cross Index at the bottom of the page should be completed by the Surveyor. Only the single Township index where the corner is filler shall be completed.

The lower righthand corner is a corner location diagram and should have the pertinent section filled in at the top and a closed circle in dicating the appropriate corner position in the section filled in. This is intended to be an aid in searching the "Record" once it has been filed
