

CERTIFIED CORNER RECORDATIONCorner C-W 1/16 Section 36 T. 35N R. 26W P.M.M. LINCOLN CountyG.L.O. Record:

This interior section subdivisional corner was never set by G.L.O. or other original government survey, but its position can be calculated by dimensions shown on the official government plat for this township.

Subsequent Record:

Certificate of Survey No. 2609, Dawn Marquardt, 7328S. Certificate shows that a 5/8" rebar with plastic ID Cap was set at the corner position. Proportional methods used to establish the corner position were not shown.

Evidence Found and New Monumentation Established:

At the calculated position for the corner, as established by proportionate measure and as shown on the attached section subdivisional diagram, I find a 5/8" diameter rebar, no cap, bent over.

I replace the rebar and cap with a Berntsen flared base monument (model #A1NBF30), which consists of a 2-3/8" diameter by 30" long flared aluminum pipe with a magnet and 3-1/4" diameter aluminum cap attached to the top, stamped as shown in detail below. I bury the rebar inside the monument pipe. Monument is on the south edge of a farm access road. Placed small collar of rock around cap, which is flush with ground.

Section Subdivision

Section 36, Township 35 North, Range 26 West
